#### 4.1 Description of first aid measures

General advice	When symptoms persist or in all cases of doubt seek medical advice.
Inhalation	Move to fresh air. If symptoms persist, call a physician.
Skin contact	Take off contaminated clothing and shoes immediately. Wash off immediately with soap and plenty of water. If symptoms persist, call a physician. Wash clothing before reuse.
Eye contact	In case of eye contact, remove contact lens and rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If possible, use isotonic eye rinse solution (e.g. 0,9% NaCl).  Do not rub affected area. Call a physician immediately.
Ingestion	Rinse mouth. If conscious, drink plenty of water. Do NOT induce vomiting. Obtain medical attention.

### SECTION 5: FIREFIGHTING MEASURES

#### 5.1 Extinguishing media

# SAFETY DATA SHEET

according to Regulation (EC) No. 1907/2006

## StoLevell Novo

Suitable extinguishing media	The product is not flammable. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Unsuitable extinguishing media	Not applicable
<b>5.2 Special hazards arising from the substance or mixture</b>	In set state, the product itself is classified as non-combustible in accordance with EN 13501-1.  The product is neither explosive nor combustible and is also not oxidising in relation to other materials.
<b>5.3 Advice for firefighters</b>	No special measures required.

### SECTION 6: ACCIDENTAL RELEASE MEASURES

<b>6.1 Personal precautions, protective equipment and emergency procedures</b>	Avoid dust formation. Use respiratory protective device against the effects of dust.
<b>6.2 Environmental precautions</b>	The product should not be allowed to enter drains, water courses or the soil. If the product contaminates rivers and lakes or drains inform respective authorities.
<b>6.3 Methods and material for containment and cleaning up</b>	Use mechanical handling equipment. Moisten and remove. Avoid whirling up dust - vacuum-clean rooms instead of sweeping. Do not use compressed air for cleaning purposes. Dispose of contaminated material as waste according to item 13. Clean contaminated surface thoroughly.
<b>6.4 Reference to other sections</b>	Refer to protective measures listed in sections 7 and 8.

### SECTION 7: HANDLING AND STORAGE

#### 7.1 Precautions for safe handling

Advice on safe handling	Avoid dust formation. When handling sacked goods and using open mixing containers, first pour in water, then carefully allow the dry mortar to run in. Keep fall height low. Start up mixer slowly.  Do not compress empty sacks, e.g. in a larger sack. Large loads of over 25 kg should be moved not by hand but with the aid of mechanical equipment only. Depending on the employee's age, gender and constitution and the frequency with which loads are lifted and carried, they may also induce a high level of strain at lower weights. Do not kneel in fresh product while working.  Provide sufficient air exchange and/or exhaust in work rooms. Do not re-use empty containers.
-------------------------	---

# SAFETY DATA SHEET

according to Regulation (EC) No. 1907/2006

## StoLevell Novo

To avoid dust formation, closed systems (e.g. silo with feed system), local extractors or other technical control devices should be used, e.g. plastering machines or continuous mixers with special auxiliary equipment for collecting dust.

Washing facilities / water for rinsing eyes and skin should be available.  
Maintain air concentrations below occupational exposure standards.

### Individual protection measures, such as personal protective equipment

- a) Eye/face protection                      Safety glasses with side-shields conforming to EN166
- b) Skin protection  
Hand protection                              Nitrile coated cotton gloves  
Break through time: 480 min  
Minimum thickness: 0,8 mm  
Protective gloves complying with EN 388.  
e.g. KCL 102 Sahara® Top (Kächele-Cama-Latex GmbH, Hotline:  
0049(0)6659-87-300, kcl-uk@kcl.de), or equivalent.  
Gloves to afford protection from chemicals (cat. III) are not required.
- Soaked gloves should be changed. Keep replacement gloves available.
- After washing hands, replenish lost skin oil by means of oily skin ointment.  
Take note of the information given by the producer concerning permeability and break through times, and of special workplace conditions (mechanical strain, duration of contact).  
The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other.
- Body Protection                              Long sleeved clothing
- c) Respiratory protection                    Avoid inhalation of particles.  
Mixing and transferring dry mortars in open systems:
- Compliance with the maximum permissible levels at the workplace is to be ensured by effective dust control measures, e.g. local extraction devices. Where this is not possible, particle-filtering half masks of type FFP2 (tested in accordance with EN 149) are to be used.
- Manual working of ready-to-use mortar: No respiratory protection necessary.
- Machining of mortar: No respiratory protection necessary.

### Environmental exposure controls

- General advice                              The product should not be allowed to enter drains, water courses or the soil.  
If the product contaminates rivers and lakes or drains inform respective authorities.
